Designed with startups in mind, the all-new FastForward R. House innovation hub helps promising ventures become sustainable businesses by combining affordable space, state-of-the-art equipment and support services with the visibility that comes from being part of the Johns Hopkins community. Whether entrepreneurs need an individual desk, whole office or full BSL2 wet lab, FastForward R. House offers myriad options for growing their businesses.

**HUB SPACE**
- Private offices, co-working desks and secure storage areas
- State-of-the-art conferencing and meeting spaces
- Free WiFi and high-speed Internet connections
- Access to legal, accounting and fundraising experts
- Full-time office manager
- Unlimited coffee to fuel inspiration

**LAB SPACE**
- Private BSL2 wet labs
- Maker space for rapid prototyping
- An assortment of shared scientific instruments
- Access to JHU Core Facilities
- Full-time, experienced lab manager

A short walk from Johns Hopkins University’s Homewood campus, FastForward R. House occupies 9,000 square feet of a renovated industrial space that includes an innovative food hall and other startups in Baltimore’s burgeoning Remington neighborhood.

Through the development and retention of startups, Johns Hopkins Technology Ventures aims to strengthen Baltimore’s innovation ecosystem by enabling entrepreneurs, investors, industry experts and leading academic researchers to meet, collaborate, network and grow.
