

Challice Bonifant, M.D., Ph.D.

Titles & Department

Assistant Professor of Oncology, Assistant Professor of Pediatrics

Specialization Areas

Engineered cellular immunotherapies for the treatment of Acute Myeloid Leukemia, Immunotherapy of cancer, malignant hematology.

Summary of Research & Work

Dr. Bonifant's research interests are in the areas of immunotherapy of cancer and malignant hematology. Currently, her research focuses on design and development of immune therapies as a treatment for poor-prognosis cancers, including development of engineered cellular immunotherapies for the treatment of Acute Myeloid Leukemia NK cells, CAR-T
